5G

SRM-3006 - “5G Upgrade” Program*

Upgrade your SRM-3006 now and become fully 5G ready!

Special Offer 5G Upgrade Program:
Narda announces a special discount on SW option and antennas for 5G.

Who is Eligible?
All SRM-3006 analyzer users can upgrade and future-proof their basic unit by participating in the 5G Upgrade program.

What are the Terms?
Simple ones. Narda will offer a special discount for every purchase of **5G NR Software Option** and/or **5G FR2 LNB Antennas (directional or omnidirectional).**

What are the savings?**
Customers receive a discount up to 25% off the sales price.

How to order?
Simply contact the Narda distributor from whom you purchased your SRM-3006.

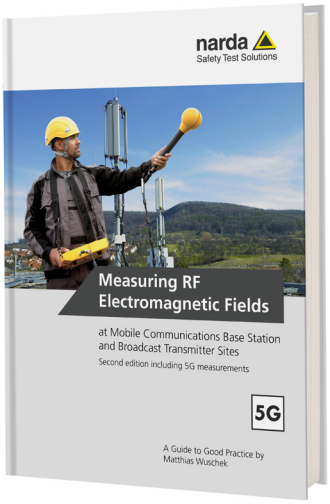
The benefits

- For extrapolation to maximum traffic in FR1, do a code-selective measurement.
- Extend frequency range of your existing SRM-3006 to FR2 and cover frequencies from 24.25 – 29.5 GHz.
- 5G FR2 LNB directional antenna to detect the field strength of geographically separated antennas.
- 5G FR2 LNB omnidirectional antenna for overview measurements and close to standard conform isotropic measurements.
- Benefit from further discounts by ordering the antenna set, which includes both a directional and omnidirectional 5G FR2 LNB antenna.
- With your order you will also receive the SRM-3006 book on measurements with SRM, which has been updated to include 5G, free of charge.

* This program is for a limited time only. Until October 15, 2023.
** Exact discount depends on locally offered prices.

WHAT ELSE?

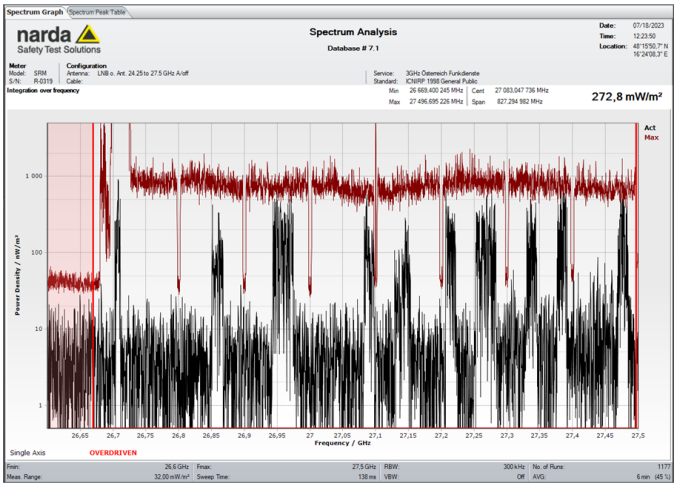
The LTE options for SRM-3006, not only capable to measure 4G but also the 4G/5G DSS systems, are the perfect tools for any site survey. Together with the 5G NR option you are now future proof for code selective measurements in 5G NR FR1, the base for extrapolation to maximum traffic.



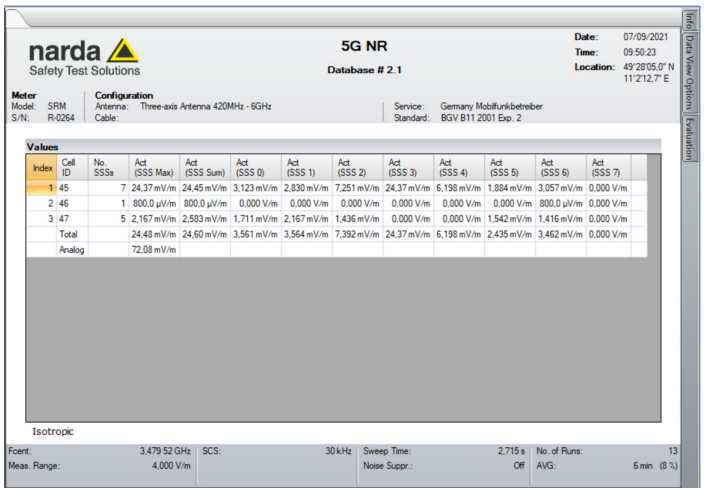
Ordering Information

P/N	Descriptions	Price in Euro**
3701/08	Option, 5G NR for SRM-3006 - code-selective measurement	9.700
3591/101	Set 5G FR2 LNB Ant. directional, 24.25 to 29.5 GHz	18.000
3591/102	Set 5G FR2 LNB Ant. omnidir., 24.25 to 29.5 GHz	18.000
3591/103	Set 5G FR2 LNB Ant. dir. + omn., 24.25 to 29.5 GHz	28.000

5G-Upgrade Program until October 15, 2023



5G NR service in the FR2 frequency range measured with downconverter antenna (LNB antenna)



Code-selective measurement with option 5G NR

** Exact discount depends on locally offered prices
