

11.2 Localizing a transmitter: Watch us as we go

What's it like to practice using Narda's portable RF Direction Finding Analyzer [SignalShark](#) and the [ADFA 1](#) automatic antenna to localize the BCCH of a GSM cell? Dead easy! It doesn't just look easy, it really is. Why not be entertained by watching us as we perform a localization using the ADFA 1 automatic antenna and the Narda SignalShark.

Localization, take one, lights...camera... and [play video](#):
<https://www.youtube.com/watch?v=8He17BPhOrl>

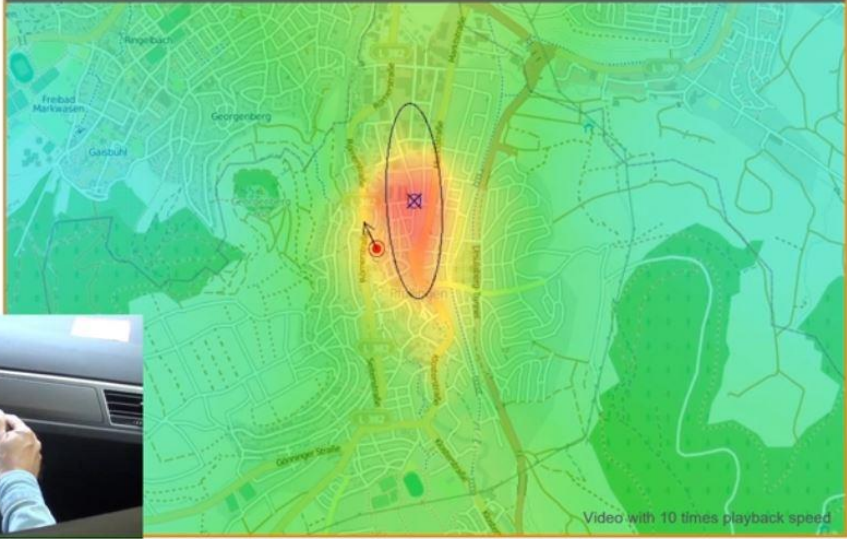

If a YouTube video isn't enough for you, our [sales partners](#) will be happy to take you along for a localization run. You're just one click away. SignalShark, live and hands on.

Localization of Interferer by SignalShark with ADFA 1

Fully Automatic Localization

No need for external PC

Video with 10 times playback speed
