8.2 RMS or not RMS? That is the question!

Does the Narda NBM show the RMS (Root Mean Square) value? The limit values specified by ICNIRP or measurement standards such as IEC require that the display shows the RMS value of the electromagnetic field that is measured.

The answer to the question is yes, absolutely. You can read all about this in our Technical Note TN012. This publication also tells you how the required averaging algorithms are implemented in the NBM, for example. Enjoy the read!
