

## 14.1 RadMan 2 – Practical test on 5G antennas — how to use a Personal Monitor correctly

How do you use a [Personal Monitor](#)? How do you test whether the antenna has actually been switched off? A practical test using the [Narda RadMan 2](#) on one of the first operational 5G installations shows how, in the form of four instructive documentary videos. Once again, Telstra/Australia provides the pioneering example. If you want to help your staff to get familiar with the use of a Personal Monitor or to see how you are warned of strong fields when in the vicinity of antennas, check out our [YouTube channel](#) for the answers. Thanks, Telstra!

Why not visit us at [IBC Amsterdam](#) from 13 – 17 September 2019 in Amsterdam, The Netherlands at Stand 8.E24 or at [A+A Düsseldorf](#) in Düsseldorf/Germany from 5 – 8 November 2019 at Stand 6D36 and convince yourself of the advantages of our [personal protection equipment](#).
