

16.1 The first brochure that protects you

Well, maybe not the brochure itself. But what's in the [brochure](#) definitely has the potential to make your life in and around strong electromagnetic fields safer. [RadMan](#) and [Nardalert](#) are synonymous with [personal monitors](#) in professional circles. They warn you when limit values are reached or exceeded. To make it easier for you to decide whether you want the [RadMan 2](#) or the [Nardalert S3](#) to give you the warning, we've compared the two products in a [brochure](#).

We just want to emphasize that you should never be without one or the other!
