

30.1 Narda on YouTube & LinkedIn

Who reads operating instructions these days? When a problem needs solving, there's a tutorial on **YouTube**. There's a video for practically everything these days. So that's why we're really pleased with our new presence on YouTube. If you want to know how to measure 5G correctly, or how to operate the SignalShark effectively, our YouTube channel is the place to go. **Subscribe** to our channel to keep updated with the latest videos. And don't forget to **like** and **share** our videos, too!

SignalShark - Finding interference in mobile cellular networks with Narda SignalShark

Software updates, data sheets, operating manuals and videos:

Available now for download from our website:

- **SignalShark:**
 - We have revised and updated the [SignalShark brochure](#) for you.
- **SRM-3006:**
 - The [operating manual](#) for the SRM-3006, which has just had the “5G option” section added to it, is now available in German.
 - There is a new [firmware version 1.6.2](#) available for the SRM-3006

Videos:

The application videos for our products are all now available on our YouTube channel [here](#).

Instrument demos:

Would you like to see a demonstration of a Narda product? Contact your [Narda sales partner](#) and ask what is available.

Seminars and webinars:

- ❖ Our [seminar “Exposure measurements on wireless transmitters using the SRM-3006”](#) is aimed at beginners, more experienced and professional users in the field of selective measurement of electromagnetic fields. The dates for 2022 have been fixed, with the next seminar scheduled for May 2 – 4, 2022. Sign up soon to enjoy the benefit of the early booking discount.
You can also ask our [sales partners](#) about personalized seminar dates.

New: Regular live webinars for you:

- ❖ Tuesday 15th February 2022: 5G in a nutshell; part 5
(followed by Q+A)
Contents: If there were still some unanswered questions from parts 1-4, today we have a lot of new information and, above all, solutions. So, we'd like to get you up to speed with the latest in code selective measurement for 5G wireless systems.
- ❖ Tuesday 15th March 2022: Area Monitoring (followed by Q+A)
Contents: At least since the dieselgate scandal it has become clear that it is better to verify than to trust. Narda is not only the inventor of permanent, 24/7 monitoring of environmental pollution by electromagnetic fields, but is also the world leader in the technology of what are known as area monitors. This live webinar aims to introduce you to this technology and to answer your current questions.

❖ Next date to be announced: **Finding Interference in Mobile Cellular Networks with Narda SignalShark** (followed by Q+A)

Contents: Did you know...

... how EASY and FAST it is to trace interference with the Narda SignalShark?

... how sophisticated vehicle-based radio direction finding can be?

... how SignalShark can transfer its localization result to a navigation app that takes you right to the interference source?

All these events will be in English.

You can access and register for all the latest webinars [here](#).
